

DISTRICT CERAMICS *MADE IN SICILY*

The best of Italian design and tradition

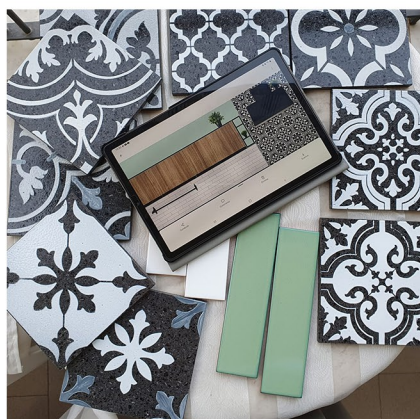

The CERAMICHE MADE IN SICILY Production District represents a vertical production line composed of a system of companies operating in different functional sectors, from quarries for the extraction of clay to the manufacture of ceramic products for domestic and ornamental uses.

The district includes marketing and all the companies that carry out support activities and that operate upstream and downstream processes of the production chain.

Sicilian ceramic objects have details that denote refinement and uniqueness which make them small masterpieces.

Santo Stefano di Camastra, Caltagirone, Burgio, Sciacca and Erice are the main "cities of Sicilian ceramics" par excellence though in the whole region we are witnessing the flourishing of numerous realities with an ideal combination of fashion, trendy design and sicilian traditional handicrafts.

REGIONE SICILIANA
